### **DETAILED ACTION**

The Office Action is in response to Amendment filed November 16, 2005. The rejections of this application have been withdrawn due to a restriction requirement. Claims 6-34, and 48 are presented for Election/Restriction.

#### ***Election/Restrictions***

I Claims 6-14, drawn to a customizable application system comprising an application user interface, web application server, an application development system to generate metadata, a configuration system, and data repository, classified in class 709, subclass 203.

II Claims 15-20, drawn to a customizable application system comprising an application execution system configured to support an internet application, user interface, user customizable find command configurable to search all of a result or to search only a subset of the result, personalization system, property specifying whether the find command is configured to search all of the result or only the subset, and data repository, classified in class 707, subclass 10.

III. Claims 21-34, 48, drawn to a customizable application system comprising an application execution system, application user interface including a find command, metadata characterizing the find command, data repository including data record, and property specifying the scope of the data search, classified in class 707, subclass 3.

1. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2157

Inventions II, III and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utilities such as the property specifying whether the find command is configured to search all or the result or only the subset of the result and the scope of the search based on the property received. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and the search required for Groups II, III is not required for Group I, restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
